SUMMARY

Software Developer with 1 year of hands-on experience building full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, and Node.js). Skilled in developing responsive user interfaces, creating RESTful APIs, managing databases, and implementing scalable web solutions. Brings 5 years of prior experience in finance and accounting, providing a strong foundation in analytical thinking, problem-solving, data management, and business operations. Combines technical expertise with business acumen to build practical, user-focused applications and deliver impactful solutions. Seeking a Junior Full-Stack Developer opportunity to contribute to innovative development teams while leveraging a unique blend of software engineering and business experience.

Independent University, BD

WORK EXPERIENCE

Frontend Developer

Jan 2026 – Present

Programming Hero

- Developed full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Designed and developed modern web applications using React.js, Next.js, Tailwind CSS, and JavaScript.
- Built responsive business websites, portfolio websites, and admin dashboards for freelance clients.
- Integrated backend APIs and managed frontend state using React Hooks and Context API.
- Improved website performance, SEO, and accessibility following modern web standards.
- Created reusable and scalable component architectures to support future feature development.
- Collaborated with clients throughout the development lifecycle, from requirement gathering to deployment and maintenance.
- Deployed production-ready applications on Vercel and Netlify with CI/CD workflows using GitHub.

Full-Stack Web Developer Trainee

June 2025 – Dec 2025

Programming Hero

- Developed full-stack web applications using MongoDB, Express.js, React.js, and Node.js.
- Built responsive and user-friendly frontend interfaces using React, HTML5, CSS3, and JavaScript (ES6+).
- Developed and integrated RESTful APIs to facilitate communication between frontend and backend systems.
- Implemented CRUD functionalities and managed data storage using MongoDB and Mongoose.
- Participated in debugging, testing, and troubleshooting application issues to improve performance and reliability.
- Worked with Git and GitHub for version control, code collaboration, and project management.
- Assisted in implementing user authentication and authorization using better-auth, JWT and secure coding practices.
- Developed and deployed a capstone MERN project, implementing authentication, database integration, and responsive UI design.
- Optimized frontend components and database queries, contributing to improved application performance and user experience.
